

## Healthy Meal for Child

Dads + Kids Night At the Museum is a monthly program, between October and April. A healthy, locally-made meal is provided for fathers/caregivers and their children to enjoy together.

After the meal, they participate in themed activities where they laugh, create, explore and create memories. Healthy relationships between fathers/caregivers and their children significantly contributes to the positive well-being and development of Huron County children.

Your contribution of a healthy meal feeds hungry minds with goodness. This gift will provide 5 meals for children who participate in the program.
